online blinds

MEASURING WORKSHEET – **Roman Blinds**

Hints:

-Use a metal tape measure, measure in millimetres.

-Measure width first, from outside edge of frame to outside edge of frame. Then add an extra 100mm (i.e. 50mm for each side)

-For the drop, measure the height from the top edge of frames to lowest point of the frame. Then add 150mm (i.e. 100mm for above the top of frame and 50mm for the bottom of the frame).

- Choose your control side, left or right.

- Choose the length you would like for your control chain.

**Use this information to complete the ordering section on the website.**

| Window Location / Number | Width (mm) | Height (mm) | Fabric Colour | Control Side | Control Length |
